

Riley Leong

(925) 786-2106 | rileyleong24@g.ucla.edu | [linkedin.com/in/rileyleong](https://www.linkedin.com/in/rileyleong)

EDUCATION

University of California, Los Angeles (UCLA)

Expected Graduation: June 2026

B.S. in Computational Mathematics, Minor in Data Science Engineering

- GPA: 3.7, Dean's Honors List
- **Relevant Coursework:** Data Structures, Advanced Algorithms, Database Management, Numerical Methods, Linear Algebra, Statistical Programming, Probability, Computer Architecture, Differential Equations, Multivariable Calculus

SKILLS

Languages: Python (Pandas, PyTorch, Scikit-learn, Matplotlib), SQL, R, C++, Rust, JavaScript, TypeScript, C#, Java

Tools: Tableau, Snowflake, Git, AWS, MS Excel, SQL Server, MongoDB, jQuery, Flask, PySpark, Slack

Domains: Data Visualization, Data Cleaning, Machine Learning, Time Series Forecasting, A/B testing, Strategic Presentation

RELEVANT EXPERIENCE

Fidelity Investments

May. 2025 - Aug. 2025

Data Engineering Intern

Durham, NC

- Engineered a Python tool to semantically search 7 years (1M+ emails) of internal data, generating 5M+ embeddings, enabling LLM-powered coding Q&A via vector search with an Angular UI
- Developed a Kafka-driven UI to surface filtered changes from 10M+ records by updating 5 ETL pipelines and control table
- Designed a data quality monitoring system using Python and Great Expectations via an automated alerting dashboard

OPN Healthcare

Oct. 2024 - Jan. 2025

Project Management Intern

Los Angeles, CA

- Built a data-driven cost modeling tool for oncology regimens by aggregating NCCN clinical guidelines and proprietary data enabling 95% regimen coverage and improving cost estimation accuracy by 40% across 3,000+ patient records
- Launched KPI dashboards combining sales, traffic, and patient data to drive \$2M+ reallocation across 100+ patient centers
- Directed A/B testing with geographical data to reallocate 25% of patients to closer facilities raising capacity utilization 18%

First American

Jun. 2024 - Sep. 2024

Data Science Intern

Santa Ana, CA

- Engineered a report archive system with a TypeScript frontend utilizing jQuery, connected with a C# and SQL Server backend
- Developed Python scripts to validate optical character recognition (OCR) processes with Great Expectations library reducing a proprietary model's word error rate by 6%, reducing manual data validation needs
- Restructured data transformation process using R and SQL Server to reduce database load times by 14% by adjusting stored procedures and optimizing indices, reducing I/O, and query refactoring

PROJECTS

Bruin Assistant

Jan. 2025 - Jun. 2025

Python, JavaScript, MongoDB, RedditAPI

UCLA, CA

- Engineered a Reddit Bot for UCLA's primary subreddit that automatically answers frequently asked questions using Python for keyword detection and response automation
- Integrated Reddit API with MongoDB for storing metrics on user activity and performance while reaching 1,000+ responses
- Built an interactive frontend dashboard with JavaScript (React.js) to monitor real-time metrics and visualize usage data

Data Valex

Mar. 2024 - Jun. 2024

Python, React Native, TypeScript, Great Expectations

Remote

- Developed a web application in React Native and TypeScript supported by Python library Great Expectations to perform binary and boolean data validations on uploaded datasets (csv).
- Designed a simple UI allowing 10+ data quality engineers at First American to automate elements of their data validation tasks
